PROFESSIONAL SUMMARY

Class 12 student and self-taught software and cybersecurity engineer specializing in lightweight, privacy-first developer tools and macOS-native security tooling. Proficient across systems programming, scripting, and modern web technologies, with hands-on experience designing, building, and shipping independent open-source projects end to end. Actively competes in hackathons and continues to strengthen algorithmic problem-solving through consistent practice on LeetCode.

EDUCATION

Tagore Public School — Class 12 (Current)

CORE COMPETENCIES

CLI Tool Development • Security Auditing & Automation • Cross-Platform (macOS) Tooling • AI-Assisted Developer Tooling • Open-Source Development • Data Structures & Algorithms

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Rust, Go, JavaScript, Bash, SQL

Web Technologies: Node.js, HTML, Tailwind CSS

Systems & DevOps: Docker, Terminal/CLI Development, Bash Scripting

Creative & Media: Motion Graphics, Video Editing, Industrial-Level Color Correction

PROJECTS

macaudit – [GitHub](#)

- Designed and built a local-first macOS security audit CLI, keeping all scanning and analysis on-device for full user privacy.
- Implemented an interactive Terminal UI to make running and reviewing security checks fast and intuitive.

DocuForge

- Built an open-source, ultra-lightweight CLI tool that uses AI to automatically inject inline docstrings into existing codebases.
- Extended the tool to auto-generate robust unit test suites, cutting down manual test-writing effort.
- Engineered for privacy, zero-bloat performance, and full cross-architecture compatibility on macOS.

ACHIEVEMENTS & INVOLVEMENT

- Actively competes in hackathons, building and shipping functional prototypes under tight time constraints.
- Consistently practices data structures and algorithms on LeetCode to sharpen problem-solving skills.
- Independently designed, developed, and published two open-source developer tools from concept to release.

INTERESTS

Cybersecurity Research • Open-Source Development • Competitive Programming • Motion Graphics & Color Grading
